EXPERIENCE

Research under Professor

IIIT Gwalior

📅 May 2019 – August 2019   📍 Gwalior,India

- Created an end-to-end product delivery system for users ranging from companies to individuals .
- Build to secure the logistics supply chain in Ethereum Blockchain and provides a decentralised platform to keep track of the products. Authenticity of the seller and product is ensured through Digitally verifying the signatures.
- The system enables to deliver and get products in a secured, verifiable and decentralised way using solidity smart contracts and MERN stack.

PROJECTS

MERN Social

- A web app with Instagram like features which allows to follow, connect,make private groups, search for and invite friends.
- Provides a platform to view, comment and like on shared posts along with facility of chat room and updated Push Notifications .Build using MERN stack and Socket.io.

Order Tracking System

- An interface that provides facilities such as booking and tracking an order and also sends latest updates via messaging and email.
- Web app has an admin who can manage all orders and update parcel information, assigning delivery workers with proper information regarding the route and traffic using Google Maps and Geolocation . Javascript , CSS , Express.js , Node , Mongodb

Online Flight Booking Portal

- An application to search and book flights with Payment Gateway integration.
- It also provides facilities to view, verify, cancel tickets and receive notifications. Javascript , Node , Mongodb

FindDoc

- Practo look alike web app with features such as search hospitals and doctors, book appointments and online doctor consultations as well.
- It also allows to book tests along with facility to view records, history and receive messages. Javascript , Node

ACHIEVEMENTS

- Second position in web designing contest.
- Winner in Inter school debate competition.
- Winner in Inter school art competition.
